RESTRUCTURING

In a restructuring there is no time to loose. There is also no time to be wasted through a poor communication and coordination.

BLPA Restructuring therefore follows a one stop approach. Jointly with You we access your consultancy needs regardless of jurisdiction and set up a team of experienced cross-border and local specialists which are headed by a team leader. That team leader is your dedicated point of contact to whom you might direct to and receive from all necessary advise and who will ensure that your instructions are executed at the local level. When working with us you do not have to spend your time managing various local advisors and waste resources on ensuring proper coordination.

Our philosophy when choosing local experts is to work with people who are experienced in business rather than mere consultancy. Our partners are used to assess the risks, make decisions and execute them, rather than shifting this process to their clients and to remain in the backseat.

COUNSELING IN CRISIS SITUATIONS

As we have been acting for various stakeholders in crisis situations when advising you, we can take into consideration not only your point of view but also to assess whether the suggestions made, provide for a probability of approval by the other stakeholders. A crisis is not just a confrontation, a crisis can be mastered much more efficient when taking a win-win approach. The true skill lies in searching compromises where possible and enforce your rights where necessary.
